

Strengthening Public Private Partnerships

UN-Energy and private sector collaborate to foster best practices for Public Private Partnerships to accelerate global clean electricity technology deployment, universal access to energy and eliminate extreme poverty

We, the e8, moving towards a Global Sustainable Electricity Partnership, and UN-Energy, declare our support at this Global Summit at the United Nations Headquarters for strong public-private partnerships to accelerate global clean electricity technology deployment.

Our individual and collective actions recognize the important role of: public-private partnerships, identifying best practices that support enabling energy policies, the importance of long-term stable policy frameworks to meet sustainable development goals, and the integration of partnerships into electricity and energy services development plans.

We believe that the implementation of access to modern energy services is essential to the realization of the Millennium Development Goals. To this end, we are committed to help meet the goal of universal access to energy services by 2030. This will need to be undertaken in an attractive financial risk-reward atmosphere that will be created by public-private partnerships.

Together, we reaffirm the important role of public-private partnerships to accelerate the deployment of low and zero-emitting electricity technologies and energy efficiency measures at country, regional and global levels. We reiterate our commitment to closely cooperate with all public, private and civil society partners to foster sustainable energy development.

On this 2nd day of June, 2011,

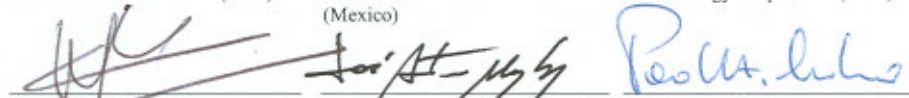

we, the signatories, affirm our interest to continue our support for the public-private partnerships:

Mr. Michael G. Morris
Chairman and CEO
American Electric Power (USA)

for Mr. Antonio Vivanco
Director General
Comisión Federal de Electricidad
(Mexico)

Mr. James E. Rogers
Chairman, President and CEO
Duke Energy Corporation (USA)

for Mr. Henri Proglio
Chairman and CEO
Électricité de France (France)

for Mr. José da Costa Carvalho
Neto
CEO
Eletrobras (Brazil)

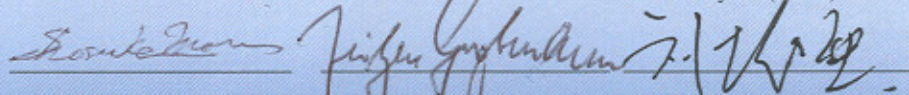

Mr. Paolo Andrea Colombo
Chairman
ENEL S.p.A. (Italy)

for Mr. Brian Dames
CEO
Eskom (South Africa)

Mr. Thierry Vandal
President and CEO
Hydro-Québec (Canada)

Mr. Evgeny Dod
Chairman of the Management
Board
JSC "RusHydro" (Russia)

Mr. Shosuke Mori
Chairman and Director
Kansai Electric Power Company,
Inc. (Japan)

Dr. Jürgen Grossmann
CEO
RWE AG (Germany)

Mr. Liu Zhenya
President
State Grid Corporation of China
(China)

Mr. Kardeh K. Yumkella
Director General of UNIDO
Chair of UN-Energy
